The submitted documents are characterized by completeness and order.

As. Prof. Hristina Atanasova, PhD has many years of academic experience in the field of commercial and insurance law. She graduated with a degree in "Law" from the "Angel Kanchev" University of Ruse in 2004. She obtained the "PhD" in professional direction 3.6. Law (Civil and Family Law) at the Faculty of Law of the RU "Angel Kanchev" in March 2012. with a dissertation on "Legal status of merchant branches". Since 2004 until 2018 she has successively held the academic positions of "assistant", "senior assistant" and "chief assistant" at the Economic Academy "D.A. Tsenov" - Svishtov. She led seminars with the students at the Academy of Economics on Fundamentals of Law, Insurance Law and Intellectual Property Law. She led the specialization "Rules and Procedures for Conducting

Business" and was a lecturer at the "Comercial Law" course. Her research interests are in commercial law, insurance law and intellectual property law. From 2018 until 2021 held the academic position of "assistant" in the Faculty of Law of the UNSS, and from February 2022 is an assistant at VUZF. Her total professional experience is over 17 years.

I do not know the candidate personally and I have no direct impressions of her appearances outside the competition.

2. General characteristics of the applicant's activity.

Assessment of educational and pedagogical activity

Currently, the candidate holds an academic position as an assistant at VUZF. She is over 17 years old professional experience in the academic field. Shee is a member of the "Accounting and Auditing" department and the Academic Council. Her academic load corresponds to the norms adopted by the university, as well as to the requirements of ZRASRB for occupying the academic position of "associate professor".

Evaluation of the candidate's scientific and scientific-applied activity

Based on the documentation presented by Assistant Professor Hristina Atanasova, the following generalizations can be made: the candidate's research, both in terms of volume and quality, is in accordance with ZRASRB, the Regulations for its implementation and the Regulations of VUZF for occupying academic positions.

The central place in the assessment of her scientific production is undoubtedly occupied by the habilitation thesis on the topic "The Conflict of interests in insurance". The topic of the monographic work has not been the subject of scientific research until now. The lack of a unified study of the conflict of interest in insurance and in judicial practice emphasizes its relevance.

The monograph has a volume of 241 pages and is structured in an introduction, three chapters, a conclusion and references (bibliographic reference). Of these, 226 pages are essentially an exposition. The table of contents is separated into 4 pages and the bibliographic reference - from 5 pages. The introduction is 4 pages long, and the conclusion - 7 pages. Each chapter is divided into paragraphs and each paragraph into bullet points. In the conclusion, both the author's conclusions and the proposals for improvement of the regulatory system (de lege ferenda) find a place. The book is the first monographic study of conflict of interest in private law insurance theory,

highlighting its uniqueness and significance. This paper is the first comprehensive study of the conflict of interest legislation in the insurance sector. It includes commentary on legal regulation, both in the public sphere and in the private sphere. Based on the substantive legal grounds for the occurrence of a conflict of interest, regulated by the public legislation, an attempt was made to give a definition of a conflict of interest in insurance. An overview of the situations in which a conflict of interest may arise in the implementation of insurance mediation was made, and the foreign regulation in the relevant field was also examined. Special attention has been paid to the prevention and detection of conflicts of interest in the management bodies of insurers. And finally, after a comparison between the foreign legislation and the Bulgarian one, a proposal was made to adopt a Bulgarian law.

The research is in accordance with the legislation as of August 2017.

The other scientific developments presented in this competition are in areas in which the candidate has scientific interests. They are a confirmation of the consistency of Dr. Atansova's scientific activity.

The total number of points in the reference for the scientometric indicators of assistant professor Dr. Atanasova is 305.75, which is slightly above the required amount.

Contributions (scientific, scientific-applied, applied) and citations

The examination of the conflict of interests, in its historical development and its differentiation from similar legal institutes, is of a contributing nature. Interest deserves the analysis of the hypotheses in which a conflict of interest may arise in the implementation of insurance intermediary activity. As a contribution, the critical analysis of the regulation in the Insurance Code when imposing coercive administrative measures by the FSC in the presence of a conflict of interest can be defined.

Contributions are also present in the studies, articles and reports submitted for participation in the competition.

The candidate's citation reference shows that she has sufficient recognition in scientific circles. Evidence of fulfillment of the minimum number of 50 points of citations for holding the academic position "associate professor" has been presented.

At the time of preparing the review, there is no evidence of plagiarism in the works of the candidate under the present procedure.

I believe that the contributions of Hristina Atanasova, PhD are her personal merit.

3. Critical remarks and recommendations

The development reveals some weaknesses: The comparison with other phenomena, such as "corruption", the crime of "bribery" and public procurement, is unsuccessful. The description of the Center for Emergency Medical Assistance - Pazardzhik is self-serving.

The proposed title provides an opportunity to consider the conflict of interests in the cases of mandatory insurance of state and municipal property, where the decision to choose an insurer is made by persons holding public positions.

CONCLUSION

The documents and materials presented by Assistant Professor Hristina Atanasova, PhD, meet all the requirements of the Law on the Development of the Academic Staff in the Republic of Bulgaria (ZRASRB), the Regulations for the Implementation of the ZRASRB and the relevant Regulations of VUZF.

The candidate in the competition has submitted a sufficient number of scientific works published after the materials used in the defense of the ONS "doctor" and meet the minimum national requirements for occupying the academic position "associate professor". The candidate's works contain original scientific and applied contributions. His theoretical developments have practical applicability, and some of them are directly oriented to academic work. Assistant Professor Atanasova's scientific and teaching qualifications are unquestionable.

The results achieved by assistant professor Atanasova in the educational and research activities fully correspond to the Rules of the VUZF for the application of ZRASRB.

After getting acquainted with the materials and scientific works presented in the competition, analyzing their significance and the scientific, scientific-applied and applied contributions contained in them, I find it reasonable to give my positive assessment and recommend the Scientific Jury to prepare a report-proposal to the Academic council for the selection of assistant professor Dr. Hristina Atanasova for the academic position of "associate professor" at VUZF in professional direction 3.6. Law (Commercial and Insurance Law).
